Subject: RE: Tags for US v. Epstein Relativity Database

Date: Tue, 29 Sep 2020 22:44:47 +0000

Hi █████,

Thanks for all of your help. Can you please (1) remove the responsiveness review field; and (2) create the following additional tags:

- 3600
- █████
- ████████
- ████████

Please let us know if you have any questions.

Thanks,

████

Hi █████,

When you rename this folder, could you please also break the folder into review batches of 500-documents each, and assign a third to me, a third to █████, and a third to █████?

Thanks very much,

████

Hi █████,

Thanks very much for the quick response. We would like all tags in one field with check boxes, please. We want to be able to tag each document with multiple tags if appropriate.

Also, in the same "US v Epstein" database, would it be possible to please rename the folder entitled "Florida Investigation FOIA Files_2" to "FBI Files from Florida Office"? The new title will help us understand what is actually in that folder.

Thanks very much,

Good Morning,

Do you want all of these tags in one field or in several fields? Also do you want these tags in both of the Epstein Relativity databases?

Thank you.

Hi [REDACTED],

We would like to use several tags as we conduct our review of documents in the "US v Epstein" database on Relativity. For that database, would you please help us create the below tags?

- Reviewed
- Witness Statement
- Produce As Is
- Produce With Redactions
- Produce As Confidential
- Produce As Highly Confidential
- Work Product (Do Not Produce)
- Potential Brady
- Hot Doc
- For Further Review
- Tech Issue

Please let me know if you have any questions or would like to discuss.

Thanks very much,
